Experience the Saint Stanislaus Boarding Difference

Helping Young Men Grow in Independence, Character, and Purpose

Choosing the right environment for your son's education is one of the most important decisions you'll make. At **Saint Stanislaus**, our boarding program provides more than just a place to live—it offers a transformative experience that shapes confident, capable, and compassionate young men.

Self-Reliance and Responsibility

Boarding students at Saint Stanislaus quickly learn how to take care of themselves and manage their time effectively. From completing schoolwork independently to handling personal responsibilities, they develop strong life skills that prepare them for success in college and beyond.

Fewer Distractions, Greater Focus

With limited access to television, video games, and phones, our students can focus on what matters most—their studies and personal growth. This supportive environment helps them thrive academically and develop strong study habits that serve them for life.

Cultural Diversity and Global Awareness

Living and learning with peers from across the country and around the world teaches our students respect, empathy, and understanding. These daily interactions foster lifelong friendships and a global perspective that broadens their worldview.

Character and Integrity

Saint Stanislaus boarding students are immersed in a community built on honesty, respect, and hard work. These shared values help shape men of integrity who stand out for their maturity, leadership, and moral strength.

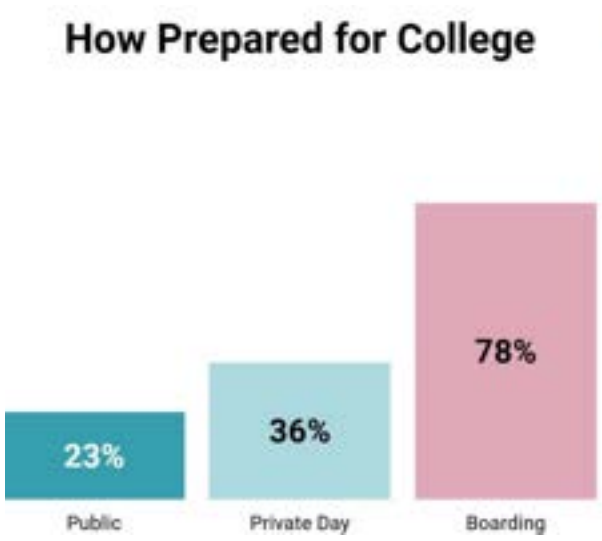
Expansive Extracurricular Opportunities

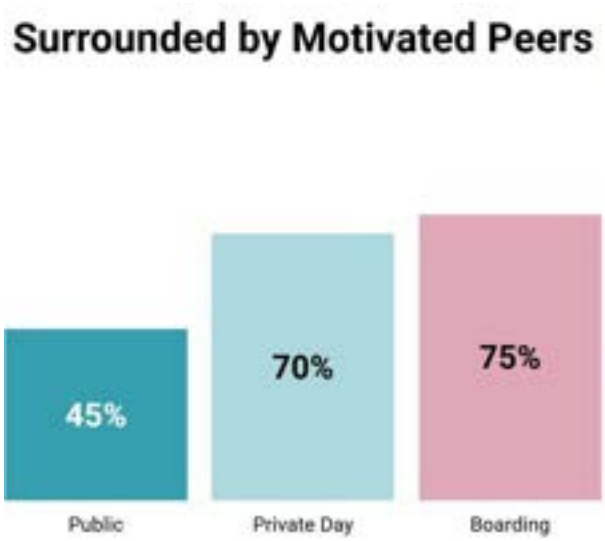
From athletics and performing arts to sailing and eSports, our students have access to a wide variety of extracurricular activities. These experiences help them discover new passions, build teamwork skills, and develop confidence both on and off campus.

Language Fluency and Communication Skills

For international students, the immersive experience at Saint Stanislaus accelerates English fluency—often within two semesters. Many graduates become bilingual, a valuable skill that enhances their academic performance, cognitive abilities, and global career opportunities.

Boarding Education by the Numbers





According to **The Association of Boarding Schools (TABS)**:

- Boarding students spend more time on homework and academic pursuits.
- They are surrounded by motivated peers in a challenging learning environment.
- They graduate better prepared for college and life beyond the classroom.

Experience Saint Stanislaus

A boarding education at Saint Stanislaus helps young men become well-rounded individuals—strong in mind, body, and spirit. They leave ready to lead, to serve, and to make a meaningful impact in the world.

We invite you to learn more about how Saint Stanislaus can help your son reach his full potential. It would be our honor to partner with your family in shaping his future.
